DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis et al (US6138155) in view of Marsh et al (US5848397). Davis et al teaches serving targeted third party advertisements on webpages. Marsh et al teaches to provide a "specified portion" of the banner ad to be selected in order to carry out email communications with the third party vendor. It would have been obvious to one of ordinary skill at the time of the invention to have included such a feature with that of Davis et al so that the vendor can receive and send promotional/informational materials by email to the requestor. Emails sent to the user are personalized at least as far as they are personally addressed to the requestor of information. When the user interacts with the specified portion of the banner, this is taken to prove and indication of option selection. Davis et al teaches that personal information about the user is determined and employed to target ads by way of profiles and cookies. It would have been obvious to one of ordinary skill at the time of the invention to have provided a message stating that "your email has been sent to us" or "we will be emailing you the requested info soon" as a courtesy. Completing the steps needed to initiate the email communications

Art Unit: 3622

is taken as inherent consent for such communications. It would have been obvious to one of ordinary skill at the time of the invention to have provided multiple options to select on the banner ad, such as "learn more via email" and "learn more via telephone" and "learn more via postal mail" so as to provide convenient, well known ways to communicate with customer prospects.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey D. Carlson whose telephone number is 703-308-3402. The examiner can normally be reached on Mon-Fri 8:30-6p, (off on alternate Fridays).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Stamber can be reached on 703-305-8469. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
